

Design Notebook

The following pages are taken from team Design Notebooks from past Junior Solar Sprint competitions that the officials picked out to use as examples. Note that the layout and specific content showcased are not official rules, but rather ideas and suggestions for creating the notebooks that the judges from that particular year liked.

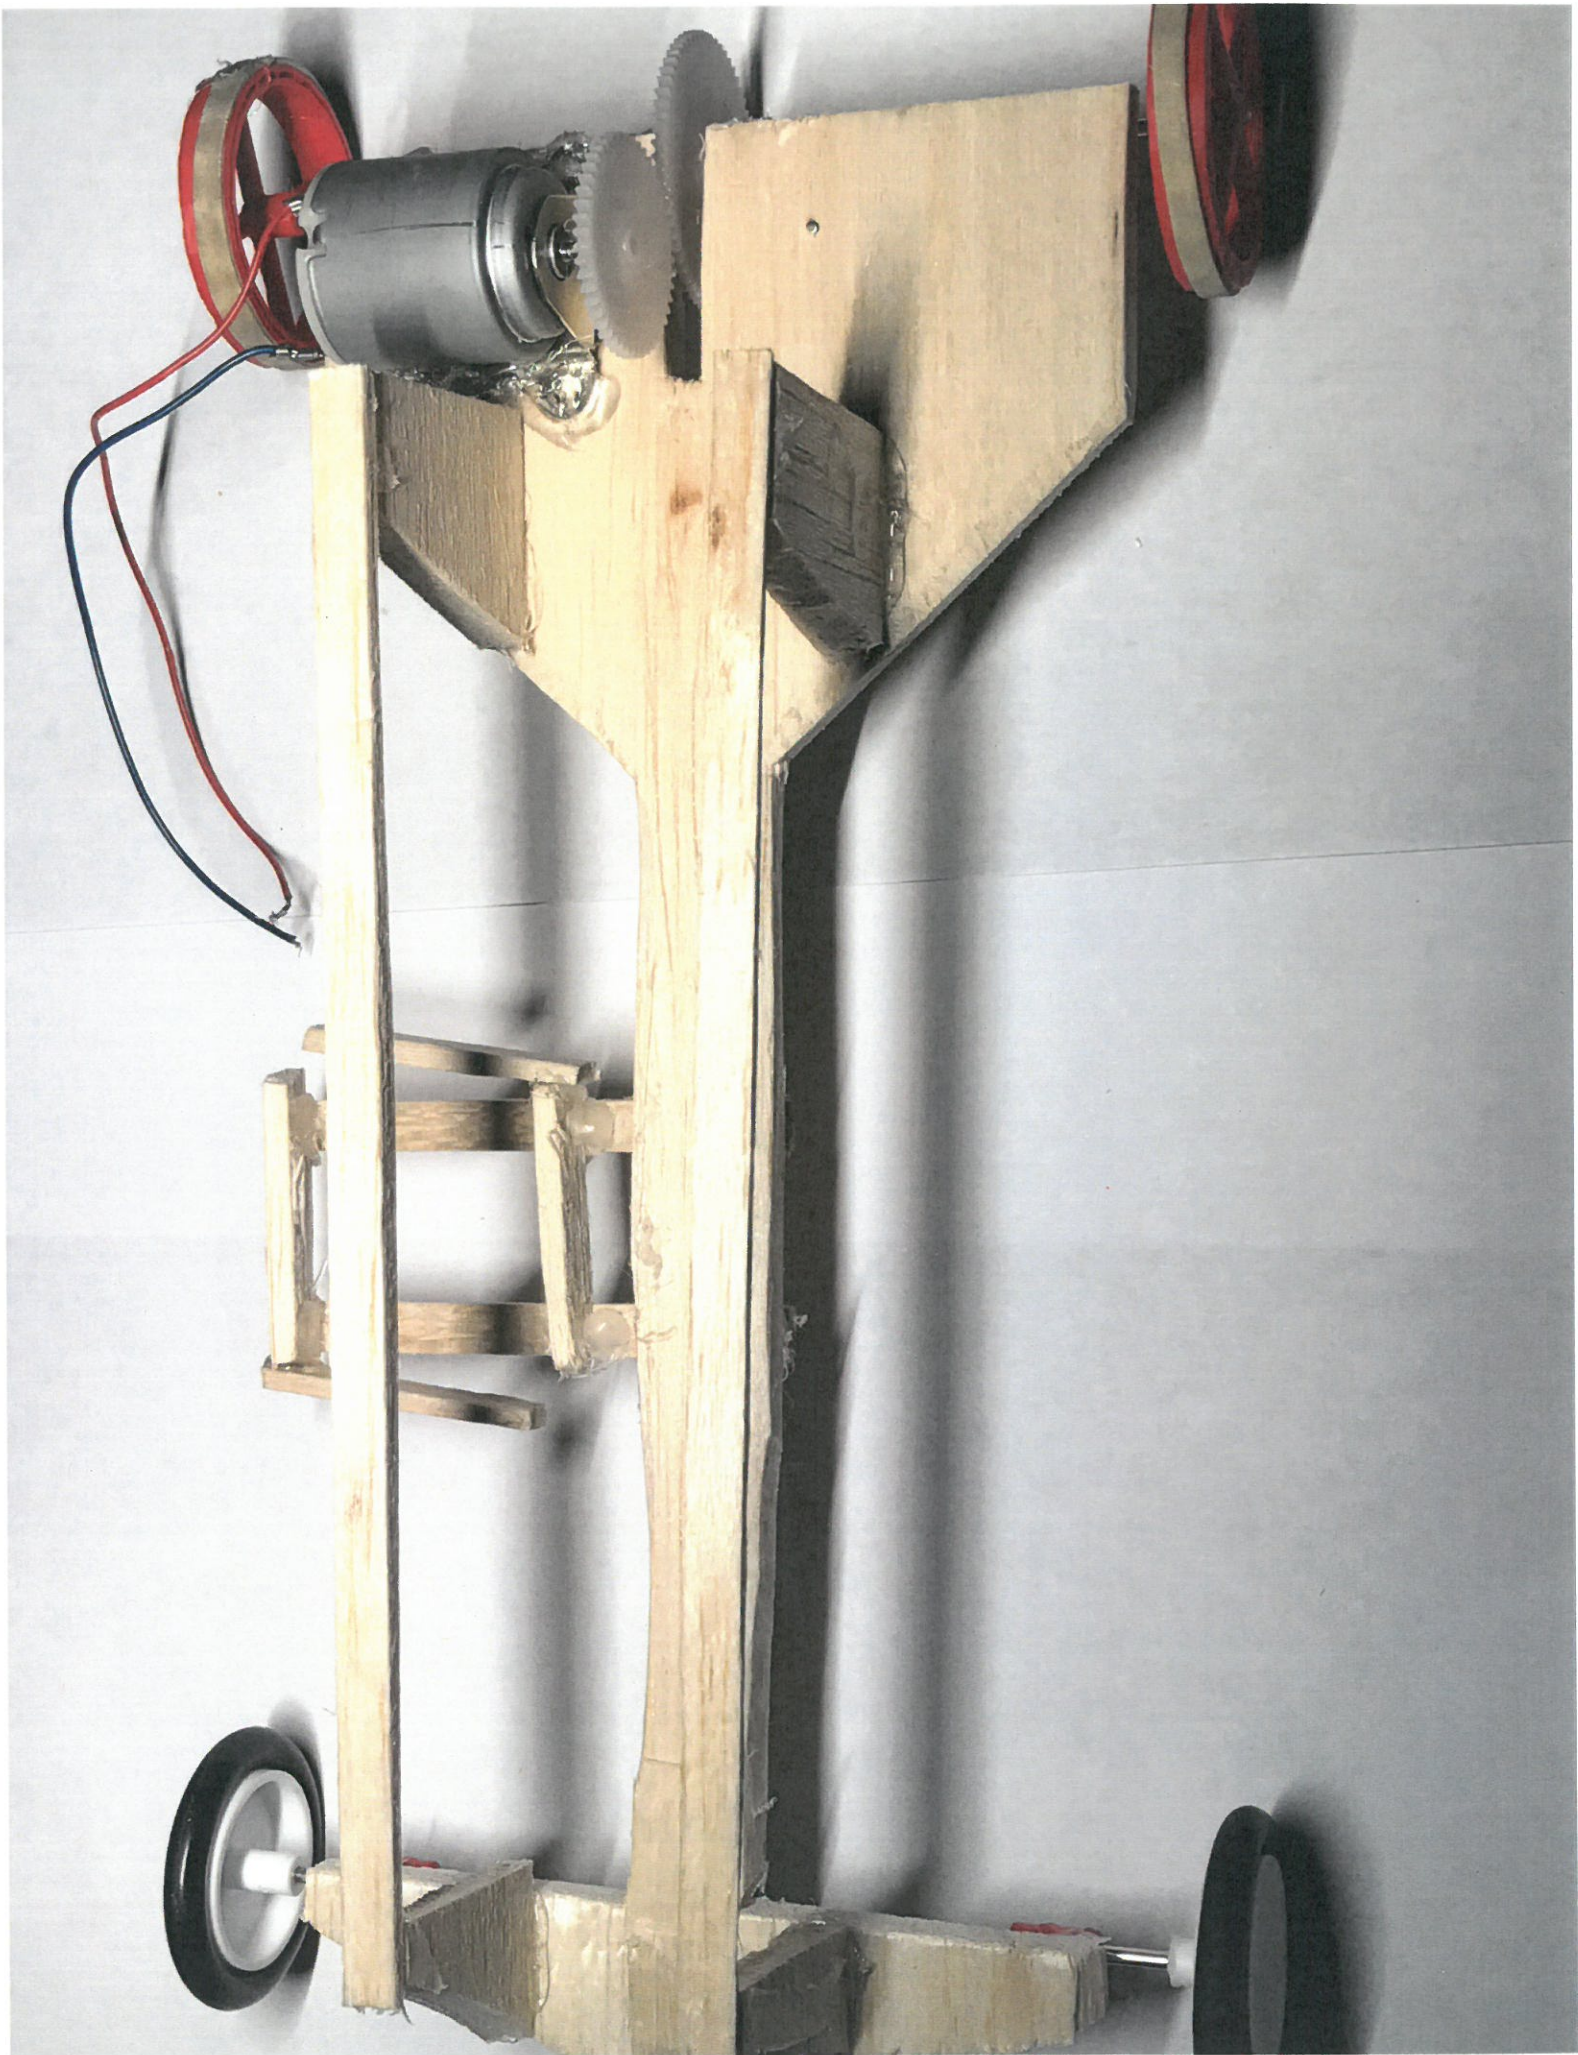

Please refer to the official rules for what is required in each section.

EXPERIMENT RAY CATCHER

RAY CATCHER

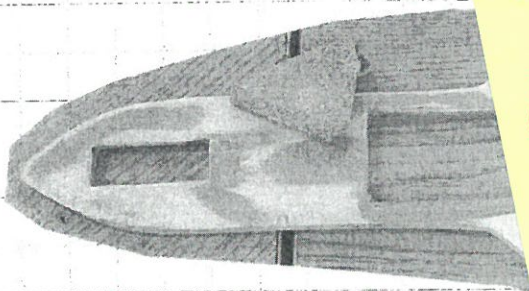

Design in Process

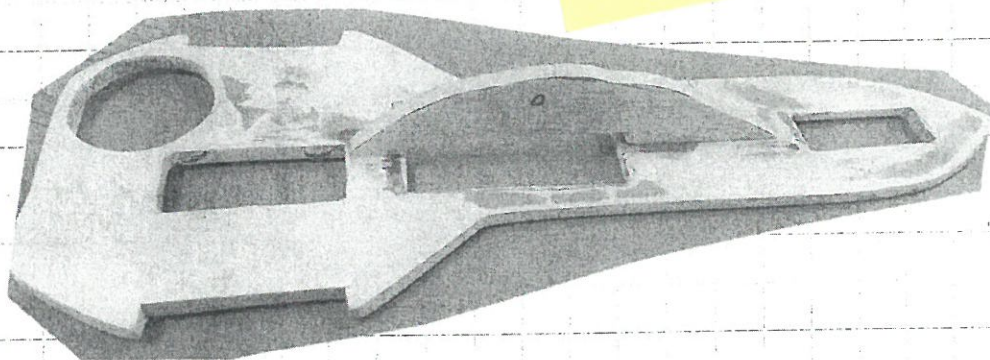

We took everything off our old car.

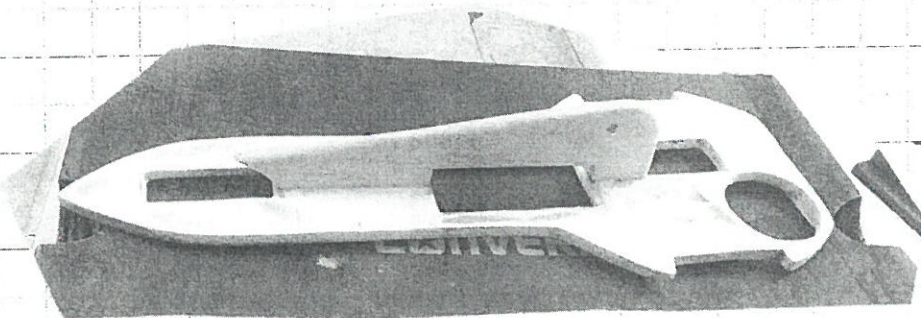

Nice Extra: Photos to document process

We sanded it down so it could be smoother and to straighten the car.

Our first design for a new panel holder

We decided to change our panel holder because this design will have the panel more stabilized & it looks better.
