

Critter Comfort Cottage ~ Judging Score Sheet

Points will be given based on the following categories:

The guiding questions in each category (below) are coded—black (all judges), blue (energy specialist), and red ('critter' specialist)

Design Decisions: How well does the team understand energy efficient/green building design? How well thought out are their design decisions? Was careful attention paid to parts selection and integration? Was proper attention paid to safety issues? How well does the team understand the habitat needs of their chosen critter?

Energy Savings/ Green How much energy has been saved? How was this calculated? What was the project cost or cost savings?

Building Technology: Were recycled and/or green materials used? How well is energy efficiency, green building practices and renewable energy represented in the project, marketing and presentation?

Construction Technique: How well did the students construct their design? Is the design durable? Can the construction be altered to accommodate changing needs of the pet?

Design Function: How well does the design function according to team specified energy efficiency goals? Does the design provide a good habitat for the pet? Are the size and features appropriate? Will the habitat maintain appropriate temperatures?

Creativity of Design: How creative is the design? Is it a novel or interesting solution to a problem?

Marketing Materials: Do the marketing materials inspire interest, or create demand for the product? How well did the student team market their cottage to you during your judging visit?

Please be consistent in awarding points as follows:

0 1 2 3 4 5 6 7 8 9 10

Poor.....Fair.....Good.....Impressive.....Excellent! _____ Judge

Team Number / Name	Design Decisions	Energy Savings	Construction	Design Function	Creativity	Marketing	Total
