

Energy Innovations ~ Judging Score Sheet

High School Division

Points will be given based on the following categories:

- Design Decisions:** How well does the team understand PV design? How well thought out are their design decisions? Was careful attention paid to parts selection and integration? Was careful attention paid to safety?
- Construction Technique:** How well did the students construct their design? Is the design durable? Is the project safe?
- Design Function:** How well does the design function according to team specified goals?
- Delivered Message:** How well is photovoltaic technology and renewable energy represented both in their project and their marketing materials?
- Creativity of Design:** How creative is the design? Is it a novel or interesting solution to a problem? Does it include artistic elements?
- Marketing Materials:** Do the market materials inspire interest, create demand, or promote understanding in the product?

Please be consistent in awarding points as follows:

0 1 2 3 4 5 6 7 8 9 10
 Poor.....Fair.....Good.....Impressive.....Excellent!
