

NBCUniversal Sustainability Updates

› February 2023

Carbon Neutral by 2035

We believe in protecting the environment where we live and work, so we have a sustainable planet now and in the future. That is why we have made the goal to be carbon neutral by 2035 in Scope 1 and 2 emissions across our entire global operations.

To meet our goals, we are focused on:

Sourcing renewable and clean energy

Improving energy efficiency

Science-based measuring and emission reporting

Joined Science Based Target initiative

Committed to setting near-term targets in the next two years

Progress on Our Goal

28%

Reduction in enterprise-wide Scope 1 & 2 emissions compared to 2019

663 GWh

Comcast more than doubled renewable energy use between 2020 & 2021

We Understand Our Emissions

Our Scope 1 & 2 Emissions

Our Scope 3 Emissions

1. Categories 11 and 13
 2. Categories 1 and 2
 3. Categories 3, 4, 5, 6, 7, 8, and 12

We Have Defined Our Sustainability Vision and Pillars

Vision Statement

Address the climate crisis with bold action and innovation throughout our company.
Beginning with our carbon neutral goal, we will reduce our environmental footprint across our global operations and leverage our platforms to inspire a sustainable future.

Energy & Emissions

- Measure & manage emissions
- Real estate expansion
- Renewables & efficiency
- Cleantech investments
- Supplier engagement

Educate & Inspire

- Sustainable productions
- Storytelling that inspires
- Power of our platforms
- Employee engagement
- Communications
- Green benefits

Materials & Waste

- Reduce & manage waste
- Water conservation
- Ban single-use plastics
- Source green products
- Consumer products
- Improve diversion rates

We've Identified Our Greatest Sustainability Solutions

Our first Sustainability Long-Range Plan creates a pathway to our environmental goal and meets our industry peers across our sustainability pillars:

	Pillar	Sustainability Solutions	Description
PILLAR 1	ENERGY & EMISSIONS 	Off-Site Renewables	Comcast-led effort to procure renewable energy, our largest emissions solution
		On-Site Solar & Utility Renewables	Generate and consume renewable energy where we work
		Facility Decarbonization	Replace existing infrastructure that consumes natural gas & leaks refrigerants
		Fleet Electrification	Convert the fleet to zero emission vehicles, including charging infrastructure
		Clean Generators & Production Power	Generators provide temporary power for productions & facilities
		Green Building Standards	Embed sustainability considerations in the design & planning of new development
PILLAR 2	EDUCATE & INSPIRE 	Sustainable Production Program	Continue expanding program to reduce impacts behind the scenes on productions
		Sustainable Content	Partner with talent & creatives to normalize sustainability messaging across our platforms
		People Programs	Empower our employees to create shared purpose around sustainability
PILLAR 3	MATERIALS & WASTE 	Zero Waste Program	Highly visible sustainability effort to reduce waste & give back through food & material donations
		Scope 3 Vendor Engagement	Collaborate with our suppliers, especially in consumer products, to reduce supply chain impacts

Embedding Sustainability Across the Enterprise

Our Productions

NBCUniversal's Sustainable Production Program educates and equips its film and television productions across the company with the tools to take action and reduce their environmental impact.

Our Theme Parks

Universal Parks & Resorts welcomes millions of visitors every year at its Universal Orlando Resort and Universal Studios Hollywood vacation destinations. Park sustainability initiatives focus on three areas - reducing and recycling waste, water conservation, and maximizing energy efficiency.

Our Facilities

Operation teams across the company implement projects that improve efficiency in energy and water consumption, integrate waste reduction and recycling programs, and apply new innovative design elements that reduce the footprint of our facilities.
